## LFT1500 PM Onboard

A Brand of VPG On-Board Weighing

### High Accuracy with Lasting Reliability Approved Weighing to Class III for Waste Vehicles

**PM Onboard presents its approved chassis weighing system for charging and price management by weight.**

The LFT1500 approved body weighing system is a high-accuracy, legal-for-trade system for invoicing at the point of collection. LFT1500 comprises four or six approved load cells, which are mounted between the chassis and body, an inclinometer and the PM1800 in-cab indicator.

- Approved for trade invoicing from the cab
- OIML R76 approved to Class III
- Accurate to 20kg in 15,000kg
- Ideal for waste and recycling vehicles
- Tilt compensation of up to 10 degrees
- Comprises 4 or 6 load cells
- 22,000kg capacity each load cell

LFT1500 Load Cell

The unique 'flexible' mounting bracket allows the chassis to 'twist' enabling greater accuracies, together with the chassis inclinometer accuracies of 20kg are standard. The PM1800 weighing instrument displays large easy to read characters and features options such as Bluetooth.
